

This very simple script displays a message box showing some text.

```
<?xml version="1.0" encoding="UTF-8"?>
<scriptfile>
  <settings program="actiona" version="3.8.0" scriptVersion="1.1.0"
os="Windows"/>
  <actions>
    <action name="ActionMessageBox" version="1.0.0"/>
  </actions>
</parameters/>
</resources/>
<script pauseBefore="0" pauseAfter="0">
  <action name="ActionMessageBox">
    <exception id="1" action="0" line=""/>
    <exception id="0" action="0" line=""/>
    <exception id="2" action="1" line=""/>
    <parameter name="windowIcon">
      <subParameter name="value" code="0"></subParameter>
    </parameter>
    <parameter name="customIcon">
      <subParameter name="value" code="0"></subParameter>
    </parameter>
    <parameter name="type">
      <subParameter name="value" code="0">ok</subParameter>
    </parameter>
    <parameter name="ifNo">
      <subParameter name="action"
code="0">do_nothing</subParameter>
      <subParameter name="line" code="0"></subParameter>
    </parameter>
    <parameter name="message">
      <subParameter name="value" code="0">Hello
world!</subParameter>
    </parameter>
    <parameter name="textMode">
      <subParameter name="value" code="0">automatic</subParameter>
    </parameter>
    <parameter name="title">
      <subParameter name="value" code="0"></subParameter>
    </parameter>
    <parameter name="ifYes">
      <subParameter name="action"
code="0">do_nothing</subParameter>
      <subParameter name="line" code="0"></subParameter>
    </parameter>
    <parameter name="icon">
      <subParameter name="value" code="0">none</subParameter>
    </parameter>
  </action>
</script>
```

</scriptfile>
